TransparentCMS™

An Oviya Systems Product

Empowering Corporate Sustainability™

ENABLING COMPANIES TO BUILD, IMPLEMENT, MANAGE AND
MEASURE THEIR COMPLIANCE WITH SUSTAINABLE BUSINESS
STRATEGIES THROUGH TRANSPARENT COLLABORATION,
CREDIBLE AND VERIFIABLE REPORTING

Empowering Corporate Sustainability

Your commitment to corporate social responsibility means operating under a set of ethical values that respect people, their communities and the environment by implementing a compliance program that helps you meet your corporate sustainability objectives. Oviya Systems delivers TransparentCMS™, a compliance management solution to help achieve your sustainability goals by minimizing risk while maximizing compliance among your collaborating partners including suppliers and manufacturers, by increasing your bottom-line growth while contributing towards a sustainable planet.

TransparentCMS...

an innovative platform, built upon collaboration and transparency, for companies to implement, manage and report on their compliance program's progress in meeting sustainability goals. It enables companies to rapidly implement and use a highly configurable, easy-to-use, results-oriented Compliance Management System that is expandable and scalable to meet your current and future needs .

COLLABORATION & TRANSPARENCY

Our workflow engine supports Suppliers, Factories, Compliance Managers, Audit Managers and Auditors to work in a Real-time collaborative environment while allowing key stakeholders to take decisions at each step of the process. You can access, review and communicate with partners using program activities including workflow actions tied to information stored, real-time alerts, emails and decisions made.

All data elements are captured at source allowing for constant and verifiable visibility into current and historical program information, communications, decisions made by partners and performance against goals and standards. This ensures commitment and accountability of all partners to your sustainability goals. Verifiable and credible report data leads to public trust in your sustainability program and increase brand value.

flexible solution for
your compliance program needs

MEETING CURRENT AND FUTURE PROGRAM NEEDS

Oviya Systems recognized that it was critical that any system would need to be:

- Easily usable, quickly implementable, and affordable
- Configurable and expandable to meet both current and future company requirements.

These were the goals we set, and TransparentCMS™ is the result.

TransparentCMS allows you to expand the use of our system to other compliance standards your organization might go on to implement.

SOLUTION THAT DELIVERS BOTTOM-LINE GROWTH

Bottom-line growth delivered through a feature-rich application:

- Developed to deliver business process efficiency. Features such as workflow engine, reports, Key Performance Indicators, alerts, emails, and so on, ensure sustainability of your business operations.
- Risk assignment, Key Performance Indicators and reports help identify risks early and enables preemptive action to protect brand value, prevent damage to brand, and elicit goodwill from society.
- Identification of compliance-related costs across operations enables effective cost-reduction decisions, thus delivering competitive advantage.

Additionally, companies with sound risk management are preferred investment targets for investors.

delivering efficiency & results
to all partners

COMPANIES

- Review and approve partner profiles.
- Initiate and manage supplier self assessments.
- Recommend corrective action based on self assessment results.
- Initiate audit requests to verify compliance at factory sites.
- Collaborate and communicate with audit managers to complete the assessment.
- Assess audit results and take decisions including accepting/rejecting compliance findings or recommending corrective action plans.
- Track work lists, compliance statuses and exceptions.
- TransparentCMS facilitates actions such as: Cancel Audit, Initiate ad-hoc audits, Audit on hold, unregister factories, record incidents, configure KPIs.

SUPPLIERS, MANUFACTURERS AND AGENTS

- Review and sign compliance agreements electronically.
- Submit supplier profile, factory profiles and audit request forms
- Complete self assessment of compliance to codes of conduct.
- Collaborate with compliance and audit managers on corrective action plan.
- Receive, act and respond to corrective action plans to become compliant.
- Respond to invoice received against audits.

COMPLIANCE AUDIT FIRMS

- Receive audit requests and assign audits using online scheduling based on the availability of auditors and factories.
- Schedule site inspections at time intervals specified by companies.
- Audit Managers and auditors collaborate during the compliance verification process.
- Auditors record audit observations into the system in real time.
- Offline audit tool allows auditors to download factory and audit information, work offline and upload audit results.
- Auditors record documentary evidence, mode of verification and recommendations against each compliance criteria.
- Auditors record and submit compliance findings and incidents.
- Audit Managers collaborate with Compliance Managers and Auditors to review findings.
- Track work lists, compliance statuses and exceptions.
- TransparentCMS facilitates actions such as: Cancel Audit, Audit on hold, configure KPIs.

Rapid Implementation and Lower Cost

TransparentCMS is delivered both as a stand-alone product and as an on-demand solution via the Software-as-a-Service (SaaS) model, which allows Oviya Systems to deliver service, support and enhancements for continuously reliable performance. The system can also be customized for seamless data exchange with your existing systems.

- Low Cost Start-up
- Easily Expandable Design
- Software-as-a-Service (SaaS)

simplified
compliance management

- Create new compliance processes and define/manage business rules.
- Use templates to define custom compliance rules and content.
- Define multi-tier security at screen level, object level and data level.
- Assign access privileges by roles, user groups and locations.
- Grant secure, web-based access to each supply chain partner.
- Personalize the system interface for each user group.
- Create custom forms and agreement pages.
- Create user-defined templates for future use.
- Define rules for requiring self assessments and audits, and eliminate duplicate audits.
- Customize compliance agreement templates and self-assessment questionnaires.
- Assign risk factors to individual compliance items.
- Customize vendor registration and factory profile forms.
- Monitor and manage communications between workflow partners through emails, alerts and announcements.
BUILD/MODIFY → MANAGE → MEASURE → MONITOR → ANALYZE → DECIDE → REPORT → VERIFY → RE-EVALUATE

powerful
business analytics & reporting

- View real-time executive dashboard.
- Measure performance by defining and monitoring KPIs.
- Perform multi-dimensional data analysis and reporting without IT involvement.
- Generate reports in graphical views.
- Perform "What if Analysis" by changing risk factors.
- Export data and reports to Excel and PDF directly from system pages.
- Perform "Drag and Drop" data analysis.
- Design new reports and customize existing reports with available fields.
- Drill down or view data at the macro level.
